

AISD not only embraces challenges but excels in developing sophisticated programming systems. As AISD enters the next chapter of its narrative, a spirit of positivity permeates the district, transitioning its focus toward sustainability and effective leadership at both the district and building levels. Despite AISD’s technological prowess, the challenge lies in leveraging their impressive programming work for long-term sustainability and fostering effective leadership. Recognizing the importance of strategic data management and change initiatives, AISD is poised to drive postsecondary success, presenting an exciting new challenge—real-time, personalized case management for high school students.

In this optimistic journey, the current CCMR dashboard system is acknowledged for its contributions but is also recognized for its limitations. Lacking the capability to cross-reference individual student data points, it hindered the district’s ability to provide targeted support on a larger scale. Arlington ISD turns to Economic Mobility Systems’ CC Solutions, a transformative catalyst that fills this gap. AISD identifies the need to delve into student-level data, impacting targeted student groups that require substantial support. CC Solutions becomes the empowering link, allowing AISD to construct robust, real-time case management solutions that not only empower students but also foster equitable college and career outcomes. The transformative journey takes on a positive hue with a dedicated focus on real-time, personalized case management. CC Solutions equips AISD with tools to enhance case management at the individual student level, enabling educators to tailor support strategies based on real-time data, fostering a more personalized approach to student success. The platform further amplifies AISD’s ability to provide compelling evidence of the district’s commitment to holistic student development in terms of college, career, and military readiness.

AISD’s 2022 – 2027 Strategic Plan calls for student’s College, Career and Military Readiness to increase from 44% to 56% by August 2026. Over the past two years, AISD exceeded this Strategic Plan goal with a 2022 CCMR percentage of 68% and 2023 CCMR percentage of 77%. This outstanding success is attributed to the collaborative efforts of a cross-functional leadership team and enhanced data visibility across all students. AISD radiates positivity, embodying their district cultural tenets of “Putting

Students First and Making Every Interaction Count” in unprecedented ways. Their remarkable journey shines as a beacon, guiding other educational institutions through the complexities of data systems and change management. By leveraging CC Solutions, AISD not only addresses existing challenges but surpasses CCMR goals, emphasizing the transformative influence of strategic data utilization and the pivotal role of technology in shaping the future of education.

RESULTS

- Creation of a system-wide culture of inquiry and CCMR data analysis that informs planning around enhancing teaching and students’ learning outcomes
- Cross-departmental district team utilizes data to engage in continuous improvement processes
- Implementation of HS CCMR PLCs to focus on data-driven solutions for students
- Implementation of growth and development support practices that build campus staff’s capacity to support student CCMR outcomes
- The above processes – and culture change – resulted in AISD’s attaining a 2023 CCMR% of 77%
- AISD continues to seek improvement in students’ CCMR outcomes and has a stretch goal of 85% for 2024 graduates

NEXT STEPS

Arlington has prioritized working closely with the Tarrant To and Through Partnership on a comprehensive model to support students from middle school through a good job in partnership with higher education and workforce partners.
